PROJECT EXPERIENCE

Library Management System with Python   Nov 2020
- Developed a text-based library management system that allowed users to search books by keywords or move books
- Set restrictions to ensure books can only be moved between valid locations. Users could save their changes by reading/writing the modified records on a txt file.
- Performed unit tests and doctests to ensure functionality without errors.

HomeWork To-Do List App   Oct 2020
- Collaborated with a group of 5, provided designs in program functionality, Workflow, UX, and database for app.
- Facilitated team meetings and lead discussions regarding the overall strategic planning of our project.

OPSTEEL Steel Trading Platform   2017-2018
- In a Product Management team of 10, designed and managed functional requirements of the platform website.
- Refined purchase workflow process of the platform, resulting in enhanced effectiveness and improved UX.

Portfolio Website with React   Jan 2021
- Developed a personal portfolio website from scratch with self-learned React.js.
- Responsive and Dynamic: includes interactive visual effects, Carousel rotations, and particle effects, and 3D effects.
- Technology Used: React.js, Node.js React-Bootstrap, GitHub pages.

WORK EXPERIENCE

Digital Product Manager

Shanghai Yidu Technology Co.,Ltd.   July 2017 -August 2019
- Designed and Managed requirements of projects in Agile development iterations with platforms similar to Jira.
- Improved UX designs of the overall architecture for the company's main product, including E-commerce trading platforms and online supply chain platforms
- Participate in gray-box testings before and after iterations were launched in the production environment to ensure requirements are met

Digital Product Management Intern

Shanghai Yidu Technology Co.,Ltd.   July 2016 -June 2017
- Designed demo prototypes with Axure RP and/or Balsamiq
- Produced product requirement document (PRD).
